

NEW PRODUCT RELEASE - ACUSENSE NVR SERIES

Overview

The Hikvision AcuSense Series NVRs have been released in 8, 16 or 32 channel variants. With a built in GPU and powered by deep learning algorithm, up to 4 conventional cameras can be enhanced with the AcuSense technology. This minimises the number of false alarms by distinguishing people and vehicles from other moving targets such as raindrops and moving trees.

With a supporting compression of H.265+, these recorders can effectively reduce storage space and costs by up to 75 percent. With the ability to record up to 12-megapixels and to produce HDMI video output up to 4K (3840 × 2160) resolution, these recorders can ensure that exceptional video is always produced.

These cutting-edge NVRs also support multiple VCA (Video Content Analytics) events including vehicle and human detection, as well as smart search for the selected area in the video which improves playback efficiency. All these features make this range of NVRs a perfect solution for a variety of environments where security is a must.

HIK-76xx Series

HIK-7732 Series

Item code	Description	List price
HIK-7608NXI28P4S	Hikvision 8ch AcuSense PoE NVR, 80Mbps, H.265, VGA/HDMI, 2 Bay, 3TB HDD	\$1,053.00
HIK-7616NX216P4S	Hikvision 16ch AcuSense PoE NVR, 160Mbps, H.265, VGA/HDMI, 2 Bay, 3TB HDD	\$1,254.00
HIK-7732NX416P4S	Hikvision 32ch AcuSense PoE NVR, 16 PoE Port, 256Mbps, H.265, VGA/HDMI, 4 Bay, 3TB HDD	\$1,557.00

Features

- New logical and visualized GUI design
- Up to 16/32-ch 12 MP IP cameras can be connected
- H.265+ compression effectively reduces the storage space and costs by up to 75 percent
- Full channel recording at up to 12 MP resolution
- Supports multiple VCA (Video Content Analytics) events
